Waxing

Hair Removal Information:

- Regular waxing will cause the returning hair to feel softer and will inhibit growth.
- Discomfort will vary with skin type. With professional products and skill it is not uncomfortable.
- In areas such as underarms and bikini, there can be some pore irritation, which is normal for all skin types. A good essential oil is used to address this issue.

For Best Results:

- Exfoliate before, we'll tell you how.
- Exfoliate the next day and use our calming skin treatment.
- If you do not decide to return for a waxing service, please keep exfoliating until one week after new growth starts so ingrown hair will be prevented.
- If you do decide to return for a waxing service, please continue to exfoliate everyday. Results will be smooth soft skin and your next waxing service will be easier.
